Technical Correction

On Page 4, amendment 1.(a.) states “Rubber tracked vehicles (no steel tracks or cleats) up to 26,000 lbs curb weight.” when describing the types of vehicles that would be permitted through the OTC process. This should have “Rubber tracked vehicles (no steel tracks, although steel cleats are permitted) up to 26,000 lbs curb weight.”

Nodwell RN-110’s and other rubber tracked vehicles less than 26,000 lbs curb weight with steel cleats continue to qualify for authorization via the expedited OTC process.
